

Proximity Card Readers

CR-5395, C-5395x

Models available with white, black beige, or gray covers.

Overview

The CR-5395 is an aesthetically pleasing proximity card reader that is available with a variety of different color covers. Cards are read when they are held in the vicinity of the reader. The CR-5395 uses proximity technology that eliminates the need for reader adjustments required by swipe-type readers.

The CR-5395 is rated for both indoor and outdoor applications and mounts on a one-gang electrical box. The rugged sealed polycarbonate construction provides a high degree of vandal resistance as well as protection from harsh environments.

Standard Features

- Aesthetically pleasing design
- Easy to change colors
- Indoor/outdoor rated
- Audible and visual indicators
- Durable – vandal resistant
- Low maintenance

Application

The CR-5395 is suitable for indoor and outdoor applications when an aesthetically pleasing proximity card reader is desired.

Engineering Specification

The access control card reader shall be of the proximity type, requiring only that the access control card be held approximately 1.5" (4 cm) from the reader for the card to be read. Insertion of or swiping of the card through the reader is not acceptable. The encoded data from the access card and/or transponder shall be sent to the card reader controller (CRC) for processing. The card reader shall provide both audible and visual indication of a properly read card. When connected to the access controller the LED shall provide different flash rates when a visitor escort or a second cardholder is required for access.

The card reader output shall utilize the standard Wiegand output protocol and feature a re-present mode to prevent multiple reads from a single card presentation. The reader housing shall be constructed of a polycarbonate material, suitable for mounting on a single gang electrical box, color and location shall be as shown on the plans. The card reader shall be fully weatherized, and shall have an operating temperature of -22° to 150°F (-30° to 65°C), and shall have an operating range of 5 to 95% relative humidity, non-condensing.

The card reader shall be UL listed per UL 294 as an access control system unit accessory, and meet the appropriate FCC and DTI certifications.

The aesthetically coordinated access control card reader shall be a Edwards model CR-5395

Specifications

Dimensions (HWD)	4.7" x 3.00" x 0.68" (11.9cm x 7.6cm x 1.7cm)
Card	Read Range
PC-1326	Up to 5.5" (14cm)
PC-1386	Up to 5" (12.5cm)
PK-1346	Up to 2" (5cm)
Transmit Frequency	125 kHz
Operating Voltage	5 - 16 Vdc
Current Draw	50 mA Average
Distance from Controller	Up to 500' (150m) from Card Reader Controller
Construction	Sealed weatherized polycarbonate enclosure
Approvals	UL-294 FCC part 15, United States DTI (MPT 1337), United Kingdom CE Mark approved
Operating Environment	-22° to 150°F (-30° to 65°C) 5% to 95% relative humidity, non-condensing
